

Public wastewater and individual septic systems treat human wastes and dirty water from household activities such as bathing, showering, laundry and dishwashing. Neither type of system is designed to handle hazardous waste or to remove chemicals or medicines. Some hazardous materials can seriously damage systems.

Do Evil Spirits Lurk in Your Home?*

What you can do ⇨

- ⇨ use alternative products
- ⇨ store hazardous products safely until hazardous waste collection day**
- ⇨ bring hazardous products to hazardous waste collection day**

* For a list of hazardous products and alternate products please go to www.southberwickmaine.org and click on public works / transfer station.

****South Berwick Hazardous Waste Collection Day****

(Usually the 2nd Saturday in October)
